

2019 External Funding Report

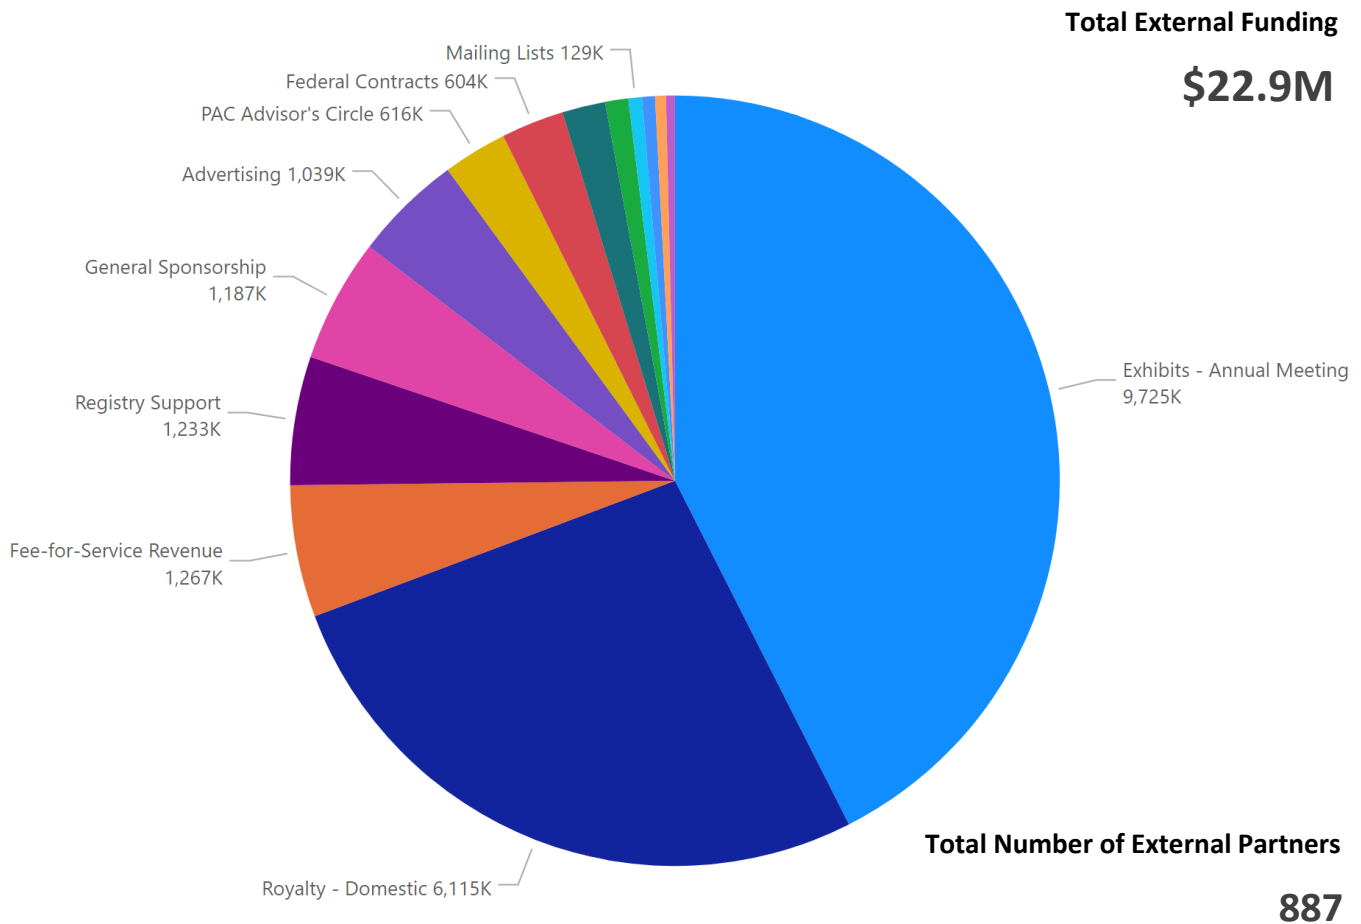

External Funding Overview

In an effort to be transparent regarding relationships with industry and external organizations, the American Academy of Orthopaedic Surgeons has developed an annual report that details all external funding to include both source and purpose.

This report includes all funding received from industry and external organizations, including grants, royalties, and all other revenue. It does not include revenue from members, which can include dues and sales of products, and it does not include revenue from hospitals that have elected to be a part of the Academy's registry program.

Information on this report is presented in two formats. The first format shows the total funding received from an organization. The second format breaks down the information even further to show funding by type and how much each organization has contributed.

Any questions about this report should be directed to Tina Slager, Finance Director. Ms. Slager can be reached by email at slager@aaos.org.
