

## COURSE PROSPECTUS

# AAOS Total Knee and Total Hip Arthroplasty Surgical Skills

**October 25-27, 2024 • Rosemont, IL  
OLC Education & Conference Center**

*“Industry support is crucial to the success of our course. To ensure our skills lab provides the best possible training, we need real surgical instruments and the latest high-tech equipment. As technology continues to advance in arthroplasty, providing our participating surgeons with cutting-edge tools is essential for mastering new techniques. This not only enhances hands-on learning but also facilitates a smoother transition from lab practice to actual surgical application. Equipping our lab with these advanced instruments will significantly enrich the overall educational experience, including our didactic sessions and case discussions. We deeply appreciate your past support and look forward to your continued partnership in elevating our program.”*
