OVERVIEW

The Shoulder & Elbow Registry (SER) is part of the American Academy of Orthopaedic Surgeons (AAOS) Registry Program. Launched in 2018, its goal is to collect data on shoulder arthroplasty, elbow arthroplasty, and rotator cuff repair procedures performed across the U.S. This data will help improve patient care by providing actionable insights to participating sites and surgeons, informing the development of performance metrics and standards of care, and supporting quality improvement initiatives and advocacy across orthopaedics.

By collecting and reporting data, the SER provides actionable information to guide physicians and patient decision making to improve care. Participation in the SER offers a variety of data reuse opportunities including requirements for quality initiatives, state collaboratives, maintaining accreditations, payment incentive and center of excellence programs. Please see the [Registry Data Reuse Opportunities](#) for the comprehensive list.
